

Class I + Class II, Two poles Surge Arresters

BPS12.5V...2P

Basic circuit diagram

Dimension drawing

The BPS12.5V 2P is class I & class II (or T1+T2) prewired two poles SPD designed for low-voltage power system lightning current & surge protection, especially for location of high risk exposure or LPZ 0-2 building entrances (IEC 62305-4) to against the damage from direct or close lightning strikes.

With built in PROSURGE high energy MOV, BPS12.5V 2P ensures remarkable lightning current discharge capacity up to 12.5kA 10/350 μ s. The unique design of thermal protection provides quick thermal response and secure disconnection. BPS12.5V 2P is ideal protection for environments with frequent switching operations or lightning strikes.

- TUV certified T1+ T2 SPD per IEC/EN 61643-11 standard.
- Prewired two poles SPD ("2+0" circuit) for use in single phase or two phase systems
- 18mm narrow model design, pluggable module for easy replacement without the need to remove system wiring.
- Unique thermal disconnector design provides quick thermal response and secure disconnection
- Lightning current capacity up to 12.5kA10/350 μ s
- Surge current capability up to 80kA 8/20 μ s
- Low voltage protection level
- High short-circuit current rating up to 50kArms, suitable for application in most AC power systems.
- Degradation failure indication and optional remote signal contact.
- Wide operating temperature -40° C ~85° C
- 35mm DIN-rail mounting
- Comply with UL1449 5th, IEEE C62.41,CSA C22.2 standards
